

## 9 REALMS

### H1 2026 Catalyst Report

ODIN v14 • Gungnir v43 • BIFROST v4 • Explosion v5.4

April 7, 2026

For informational and educational purposes only. Not investment advice.

#### Executive Summary

---

Total H1 2026 Catalysts: 366

- PDUFA Events: 71
- Phase Readouts: 295

#### Tier Distribution:

ALPHA (Strong Long): 1 catalysts  
BETA (Cautious Long): 107 catalysts  
GAMMA (Monitor): 222 catalysts  
DELTA (No Trade): 36 catalysts

#### Current Portfolio:

GRCE: GTX-104 - (STRIVE-ON) (Subarachnoid hemorrhage (SAH))  
WHWK: HWK-016 (Various Cancers)  
CRDF: Onvansertib + paclitaxel (Metastatic Triple-Negative Breast Cancer Patients (mTNBC))  
CABA: Resecabtagene autoleucel (rese-cel, formerly referred to as CABA-201) - (RESET-SSc) (Systemic sclerosis (SSc))  
ALXO: Zanidatamab and Evorpaccept (ALX148) (HER2 Breast cancer and solid tumors)

#### Current Portfolio Deep Dive

---

##### GRCE

Drug: GTX-104 - (STRIVE-ON)  
Indication: Subarachnoid hemorrhage (SAH)  
Catalyst Date: 2026-04-23

Gungnir Probability: 92.8% (T1)  
Investment Score: 77.3 (ALPHA)  
P(GOOD+ / 15%+ move): 0.03%  
P(CRASH / -30%+ drop): 8.67%

##### BIFROST Timing:

Size Tier: MICRO  
Entry: T-30  
Exit: T-1

Position Size: 4-6%

Flags: MONSTER\_POTENTIAL, PDUFA\_EVENT

WHWK

Drug: HWK-016

Indication: Various Cancers

Catalyst Date: 2026-04-16

Gungnir Probability: 92.4% (T1)

Investment Score: 71.2 (BETA)

P(GOOD+ / 15%+ move): 36.53%

P(CRASH / -30%+ drop): 6.36%

BIFROST Timing:

Size Tier: MICRO

Entry: T-30

Exit: T-1

Position Size: 4-6%

Flags: HIGH\_UPSIDE\_POTENTIAL

CRDF

Drug: Onvansertib + paclitaxel

Indication: Metastatic Triple-Negative Breast Cancer Patients (mTNBC)

Catalyst Date: 2026-04-19

Gungnir Probability: 93.1% (T1)

Investment Score: 72.4 (BETA)

P(GOOD+ / 15%+ move): 41.62%

P(CRASH / -30%+ drop): 1.87%

BIFROST Timing:

Size Tier: MICRO

Entry: T-30

Exit: T-1

Position Size: 4-6%

Flags: HIGH\_UPSIDE\_POTENTIAL

CABA

Drug: Resecabtagene autoleucel (rese-cel, formerly referred to as CABA-201) - (RESET-SSc)

Indication: Systemic sclerosis (SSc)

Catalyst Date: 2026-06-30

Gungnir Probability: 93.5% (T1)

Investment Score: 68.5 (BETA)

P(GOOD+ / 15%+ move): 0.06%

P(CRASH / -30%+ drop): 0.34%

BIFROST Timing:

Size Tier: SMALL

Entry: T-21

Exit: T-3

Position Size: 4-6%

Flags: INTERIM\_DATA, TINY\_N\_LT\_20, IIS\_HALF\_SIZE

ALXO

Drug: Zanidatamab and Evorpaccept (ALX148)

Indication: HER2 Breast cancer and solid tumors

Catalyst Date: 2026-05-07

Gungnir Probability: 94.5% (T1)

Investment Score: 74.0 (BETA)

P(GOOD+ / 15%+ move): 48.87%

P(CRASH / -30%+ drop): 2.51%

BIFROST Timing:

Size Tier: MICRO

Entry: T-30

Exit: T-1

Position Size: 4-6%

Flags: HIGH\_UPSIDE\_POTENTIAL

PDUFA Catalysts (H1 2026)

| Date       | Ticker | Drug                                  | Indication                                                | G-Tier | Score | I-Tier | Entry |
|------------|--------|---------------------------------------|-----------------------------------------------------------|--------|-------|--------|-------|
| 2026-03-28 | CNTB   | Rademikibart<br>(RADIANT-AD)          | Adolescent patients with Atopic dermatitis (AD)           | T1     | 73.3  | BETA   | T-30  |
| 2026-03-28 | RCKT   | KRESLADI (marnetegra gene autotemcel) | Leukocyte Adhesion Deficiency-I (LAD-I)                   | T3     | 58.2  | BETA   | T-21  |
| 2026-03-31 | PHAR   | Leniolisib - (pediatric)              | Activated phosphoinositide 3-kinase delta syndrome (APDS) | T2     | 65.7  | BETA   | T-21  |
| 2026-03-31 | IONS   | Bepirovirsen (IONIS-HBVRx)            | Chronic hepatitis B virus (CHB)                           | T1     | 53.7  | GAMMA  | T-7   |
| 2026-03-31 | GSK    | Bepirovirsen (IONIS-HBVRx)            | Chronic hepatitis B virus (CHB)                           | T1     | 53.2  | GAMMA  | T-7   |

|            |      |                                                                                       |                                                                       |    |      |       |      |
|------------|------|---------------------------------------------------------------------------------------|-----------------------------------------------------------------------|----|------|-------|------|
| 2026-03-31 | ALPN | Povetacicept (ALPN-303) - (RAINIER)                                                   | Lupus nephritis, IgA nephropathy                                      | T2 | 50.6 | GAMMA | T-14 |
| 2026-03-31 | OSTX | OST-HER2 (AOST-2121)                                                                  | Resected osteosarcoma                                                 | T4 | 49.2 | GAMMA | T-45 |
| 2026-03-31 | ZYME | Ziihera (zanidatama b-hrii) - (HERIZON-GEA-01)                                        | First-line HER2-positive gastroesophageal adenocarcinoma (GEA)        | T2 | 49.1 | GAMMA | T-21 |
| 2026-03-31 | VRTX | Povetacicept (ALPN-303) - (RAINIER)                                                   | Lupus nephritis, IgA nephropathy                                      | T1 | 47.1 | GAMMA | T-7  |
| 2026-03-31 | REGN | C5 Combo (pozelimab and cemdisiran) - (NIMBLE)                                        | Myasthenia gravis (MG)                                                | T1 | 46.5 | GAMMA | T-7  |
| 2026-03-31 | ONC  | Ziihera (zanidatama b-hrii) - (HERIZON-GEA-01)                                        | First-line HER2-positive gastroesophageal adenocarcinoma (GEA)        | T2 | 45.8 | GAMMA | T-7  |
| 2026-03-31 | JAZZ | Ziihera (zanidatama b-hrii) - (HERIZON-GEA-01)                                        | First-line HER2-positive gastroesophageal adenocarcinoma (GEA)        | T2 | 44.8 | GAMMA | T-7  |
| 2026-04-03 | IONS | SPINRAZA (Nusinersen) - (DEVOTE)                                                      | Spinal muscular atrophy (SMA)                                         | T2 | 50.5 | GAMMA | T-7  |
| 2026-04-03 | BIIB | SPINRAZA (Nusinersen) - (DEVOTE)                                                      | Spinal muscular atrophy (SMA)                                         | T2 | 44.9 | GAMMA | T-7  |
| 2026-04-08 | BMY  | Opdivo (nivolumab) in combination with doxorubicin, vinblastine and dacarbazine (AVD) | Previously untreated Stage III or IV classical Hodgkin Lymphoma (cHL) | T1 | 52.1 | GAMMA | T-7  |

|            |       |                                                                    |                                                          |    |      |       |      |
|------------|-------|--------------------------------------------------------------------|----------------------------------------------------------|----|------|-------|------|
| 2026-04-10 | REPL  | RP1 (vusolimogene odeporepvec) and OPDIVO (nivolumab) - (IGNYTE-3) | Non-melanoma (NMSC) / Non-small cell lung cancer (NSCLC) | T4 | 34.3 | DELTA | T-21 |
| 2026-04-13 | TVTX  | FILSPARI (sparsentan)                                              | Focal segmental glomerulosclerosis (FSGS)                | T2 | 48.3 | GAMMA | T-14 |
| 2026-04-23 | GRCE  | GTX-104 - (STRIVE-ON)                                              | Subarachnoid hemorrhage (SAH)                            | T1 | 77.3 | ALPHA | T-30 |
| 2026-04-28 | MRK   | Doravirine/ Islatravir (DOR/ISL) - (MK-8591A-052)                  | HIV-1 Infection                                          | T2 | 42.6 | GAMMA | T-7  |
| 2026-04-30 | RLFTF | RLF-OD032                                                          | Phenylketonuria (PKU)                                    | T2 | 67.7 | BETA  | T-45 |
| 2026-04-30 | PRAX  | Relutrigine (PRAX-562) - (EMBOLD)                                  | Developmental epileptic encephalopathies (DEEs)          | T1 | 50.9 | GAMMA | T-14 |
| 2026-04-30 | MGNX  | ZYNYZ (retifanlimab-dlwr) - (POD1UM-304)                           | Non-small cell lung cancer (NSCLC)                       | T4 | 50.4 | GAMMA | T-30 |
| 2026-04-30 | SRPT  | AMONDYS 45 (casimersen) and VYONDYS 53 (golodirsen)                | Duchenne muscular dystrophy (DMD)                        | T2 | 49.6 | GAMMA | T-14 |
| 2026-04-30 | AXSM  | AXS-05 (dextromethorphan HBr and bupropion HCl) - (ACCORD-2)       | Agitation in patients with Alzheimer's disease (AD)      | T2 | 45.4 | GAMMA | T-14 |
| 2026-04-30 | ARGX  | ARGX-119                                                           | Healthy volunteers, Muscle-specific kinase (MuSK)        | T2 | 45.4 | GAMMA | T-7  |

|            |      |                                                                 |                                                   |    |      |       |      |
|------------|------|-----------------------------------------------------------------|---------------------------------------------------|----|------|-------|------|
| 2026-04-30 | AXSM | Reboxetine (AXS-12) - (ENCORE)                                  | Narcolepsy                                        | T2 | 42.9 | GAMMA | T-14 |
| 2026-04-30 | INCY | ZYNYZ (retifanlimab-dlwr) - (POD1UM-304)                        | Non-small cell lung cancer (NSCLC)                | T3 | 38.1 | DELTA | T-7  |
| 2026-05-10 | ARGX | VYVGART - (ADAPT SERON)                                         | Myasthenia Gravis                                 | T2 | 44.5 | GAMMA | T-7  |
| 2026-05-18 | AZN  | ENHERTU (trastuzumab deruxtecan) - (DESTINY-Breast11)           | High-Risk HER2 Positive Early-Stage Breast Cancer | T2 | 43.2 | GAMMA | T-7  |
| 2026-05-24 | BIIB | LEQEMBI IQLIK (lecanemab-irmb)(at-home injection)               | Early Alzheimer's disease (AD) a-home injection   | T3 | 41.2 | GAMMA | T-7  |
| 2026-05-29 | MNKD | Afrezza (Technosphere Insulin) - (INHALE-1)                     | Pediatric type 1/2 diabetes                       | T2 | 63.7 | BETA  | T-21 |
| 2026-05-31 | CING | CTx-1301 (fixed dose, pediatric study)                          | ADHD                                              | T2 | 68.1 | BETA  | T-30 |
| 2026-06-02 | AZN  | Datopotamab Deruxtecan (Dato-DXd) - (TROPION-Breast02) - (TB02) | Metastatic triple negative breast cancer (TNBC)   | T2 | 43.0 | GAMMA | T-7  |
| 2026-06-05 | ARVN | Vepdegestrant (ARV-471) - (VERITAC-2)                           | Breast cancer                                     | T2 | 65.6 | BETA  | T-21 |
| 2026-06-05 | PFE  | Vepdegestrant (ARV-471) - (VERITAC-2)                           | Breast cancer                                     | T3 | 45.8 | GAMMA | T-7  |
| 2026-06-20 | ACHV | Cytisinicline - (ORCA-3)                                        | Smoking cessation of cigarettes                   | T4 | 47.0 | GAMMA | T-30 |
| 2026-06-27 | UNCY | Oxylanthanum Carbonate (OLC)                                    | Kidney disease                                    | T2 | 65.6 | BETA  | T-30 |

|            |      |                                               |                                                                                                       |    |      |       |      |

Top 50 readout catalysts shown. Total readout catalysts: 50  
Scoring Engines Overview

---

ODIN v14 (PDUFA Approval)

Architecture: 51-feature L2 Ridge Logistic Regression

Regularization: C=0.10 | Training: 1845 events | Holdout: 358 events

Walk-Forward AUC: 0.9011 | Holdout AUC: 0.9363 | Holdout Brier: 0.0895

Tier 1 Win Rate: 98.7% | Tier 1 Picks: 154

Gungnir v43 (Phase Readout)

Architecture: 144-feature meta-ensemble (85% Ridge + 15% XGB)

Training: 1752 events | Walk-Forward AUC: 0.8001 | Brier: 0.133

Drug modality × trial context interactions unlock strongest signals

BIFROST v4 (Runup Timing & Sizing)

Architecture: v2 decision matrix + triple-ensemble magnitude regression

Backtest (2022-2026): Sharpe 5.45 | Win Rate 70.8% | Max DD -4.9%

Return: \$100K → \$18.1M

CARDINAL RULE: Never hold through FDA decision

Explosion Detector v5.4 (>25% Moves)

Architecture: Ensemble (80% Ridge + 5% GBM + 15% LightGBM)

Features: 57 | LR Test AUC: 0.9332 | Ensemble AUC: 0.9307

Orphan × 7d runup = maximum explosion potential
