

Insider & Sentiment Signals (60-Day Window)

Ticker	Insider Trading (Last ~60 Days)	Institutional & Sentiment Indicators	Flag Summary
RCKT (Rocket Pharma)	CEO & two insiders sold small share lots mid-Nov (e.g. CEO sold 6,276 shares on Nov 18 for ~\$18.7K) ¹. Director (Elisabeth Bjork) then bought 10,000 shares on Jan 2 at \$3.44 (\$34K) ² – notable open-market purchase.	Vanguard disclosed ~7.9% stake (passive) in Q4. Short interest moderate (~5–10%). No unusual options activity noted.	Yellow/Green: Mixed signals – a cluster of minor insider sales in Nov (caution) offset by a bullish buy from a director in Jan (confidence).
DNLI (Denali Therapeutics)	Baker Bros. (10% holders/board) acquired ~2.285M prefunded warrants on Dec 11 at \$17.49 each ³ ⁴ (exercisable at \$0.01) – a large insider-equivalent purchase injecting ~\$40M. An officer (A. Schuth) <i>sold 17,218 shares on Jan 6 at \$16.50</i> ⁵, explicitly to cover RSU taxes (one-time disposition). No other Form 4 sales.	Baker Bros' buy dramatically boosts institutional support (very positive insider sentiment). Short interest appears low; no notable options buzz. Social chatter mildly bullish after Baker's move.	Green: Strong insider buying signal (major investment by Baker Bros) outweighs a minor tax-related sale. Insiders appear confident ahead of the catalyst ³.
IRON (Disc Medicine)	<i>Multiple insiders</i> unloaded shares after a price spike. Chief Legal Officer exercised & sold 6,500 shares on Jan 2 around \$78–79 ⁶, and another 1,000 on Jan 20 at ~\$69.74 ⁷ (pre-arranged 10b5-1 plan). An VC-affiliated director (Atlas Venture) also <i>sold small portions</i> via funds on Dec 17 around \$91.47 ⁸. No insider buys in period.	Several Form 144 filings in Dec indicated planned sales by VC holders. Short interest is modest, but insider profit-taking into strength is notable. Options flow unremarkable (stock had run-up on trial data).	Red: Clear insider selling cluster – multiple insiders trimming positions at 52-week highs. This raises a red flag as insiders capitalized on a price rally, suggesting caution ahead of the FDA event.

Ticker	Insider Trading (Last ~60 Days)	Institutional & Sentiment Indicators	Flag Summary
ETON (Eton Pharma)	CEO (Sean Brynjelsen) sold 6,732 shares on Dec 12 (~\$16.83 average, ~\$113K) ⁹. He filed to <i>sell an additional 5,015 shares</i> (~\$77K) around Jan 14 ¹⁰. These sales coincided with year-end stock grants (shares sold mainly to cover tax/liquidity). CFO similarly surrendered shares for tax on Dec 12. No insider buys recorded.	Institutions added ~+5.4% to holdings last quarter ¹¹, indicating fund accumulation despite insider trims. Short interest ~8.9% of float ¹². Implied volatility spiked in options trading (Zacks noted surging IV in Dec) ¹³ – traders bracing for the FDA decision.	Yellow: Mildly negative insider trend – leadership selling small amounts (largely administrative), with no buys. However, rising institutional ownership and high options volatility point to mixed sentiment (caution but not outright bearish).
ASND (Ascendis Pharma)	No insider trades reported in the past 3 months ¹⁴. (Ascendis is a Danish company – insider activity in U.S. filings is minimal.) No directors or officers bought/sold recently.	Institutional ownership climbed (~+2.0% last quarter) ¹⁵. Short interest is moderate (~5% of float) ¹⁶. Market sentiment is upbeat into a Feb PDUFA (multiple analysts reiterating Buy ratings). No unusual insider signals; sentiment driven by fundamentals.	Green: Lack of insider selling is a <i>good</i> sign – insiders sitting tight. Institutional buying and positive analyst outlook support a green flag (confidence) for this catalyst.
ALDX (Aldeyra Therapeutics)	No recent insider transactions (no buys or sells in Nov–Jan). Last insider buy was Aug 2025 (CFO bought 2,500 shares at \$5.30). No disposition by insiders ahead of March PDUFA.	Short interest is relatively high (~5.1 M shares, ≈9% of float) ¹⁷, though it decreased from prior levels (some shorts covered after FDA delayed the PDUFA to Mar 2026). Institutions hold a majority; one key fund (Perceptive) remains a top holder. Sentiment cautious but could swing on catalyst.	Yellow: Neutral insider stance (no trading activity = no direct signal). Elevated short interest reflects some market caution, but recent short covering hints at improving sentiment. Overall flag is yellow – awaiting the catalyst outcome for direction.
